

WAL -BASICS

Water-Jet-Assisted Lipo-
Harvesting

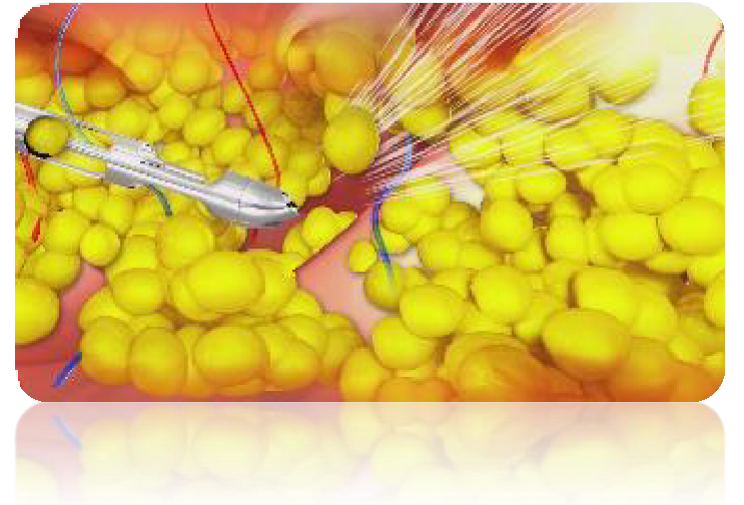

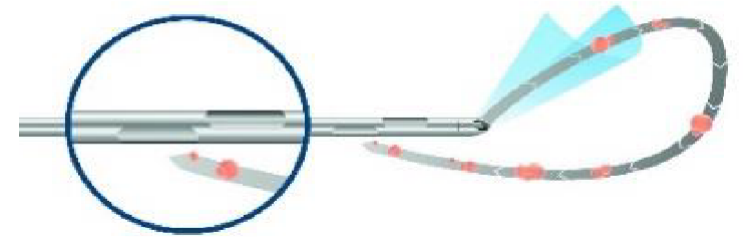

Metoden

Vann-Jet-Assistert
Fettsuging

Vann-Assistert Fettsuging

- Vann-jet er en innovativ fettsugings teknologi
- En skånsom spray løsner fett fra omgivende bindevev
- Spray og suging kan alltid gjøres samtidig – **to-kanyler-i-en teknologi** gjør dette mulig

Vann-Assistert Fettsugning

- Metoden

Hva er Vann-Jet?

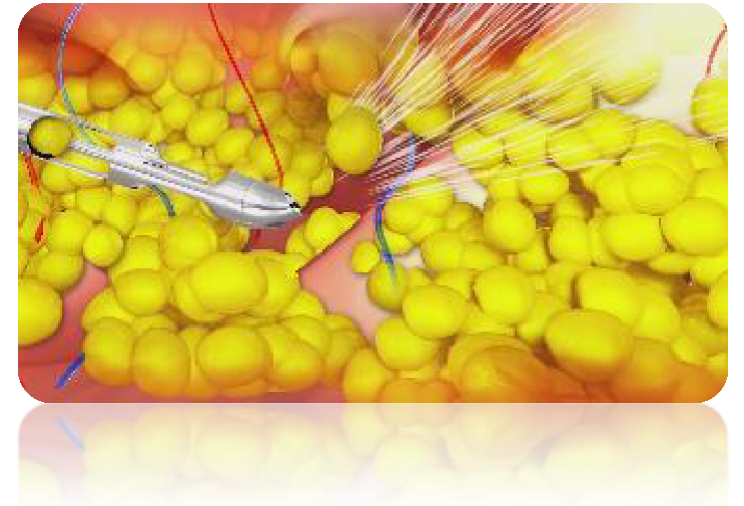

- ✓ Ingen "tumescence" teknikk!
- ✓ Ingen bytte av kanyler for bedøvelse/suging!

Vann-Assistert Fettsuging

Forskjellene

- SAL – Standard/Suction Assisted Liposuction
- PAL – Power Assisted Liposuction
- UAL – Ultrasonic Assisted Liposuction
- LAL – Laser Assisted Lipolysis

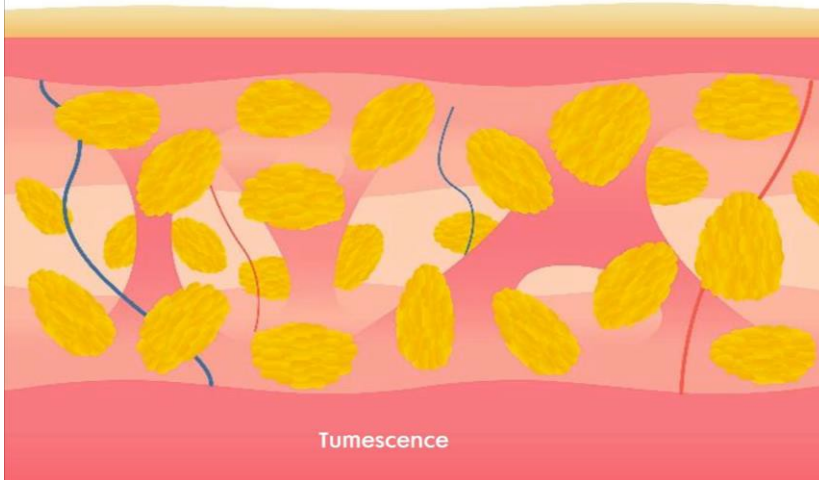

De bruker alle "tumesence" teknikk for å ødelegge fettceller

WAL er IKKE en tumescence prosedyre!

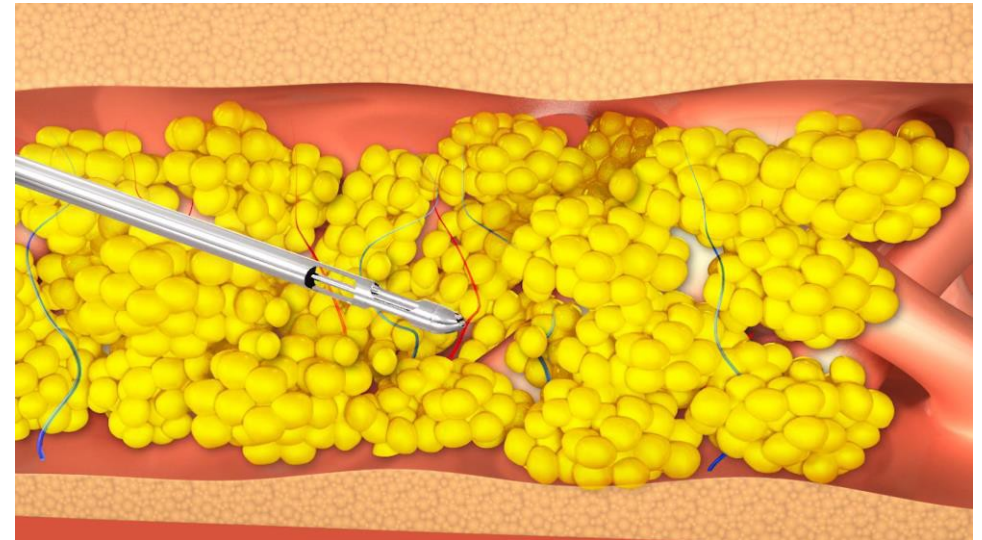

Vann-Assistert Fettsugung

Tumescence

- 2-3 L infiltration fluid
- Waiting time 30-45 min
- High tissue damage by mechanical force

WAL

- Some cc fluid
- No waiting time
- Prevents connective tissue

Vann-Assistert Fettsuging

Fordeler

- Water-jet metoden er ikke en "tumescence" teknikk
- Water-jet metoden trenger vanligvis ikke narkose
- Mindre hevelse, ser resultatet raskere
- Mer skånsom, mindre smerter, mindre arrvev
- Kortere rekonvalesens tid
